

The following is my Response to Your Questions

1. The most single issue facing council is roads and bridges.
2. Water quality control and fire protection.
3. a) Encourage more building to increase tax revenues. b) Yes, pursue as much as possible. c) Building and plumbing costs could be waved. d) See that taxpayers get best value for their tax dollars.
4. Lake associations provide information to council what is needed to improve the issues on the Lakes. Who knows better than the people who live there ?
5. Yes, I support consolidation of services (more) as sometimes duplication costs money.
6. I think the way to sustainability is to work together with the Lake association to follow the official plan to keep the water quality good and control building.
7. a) I think working together with the Lake associations can meet a fair balance between regulations and enforcement. b) The Chief Building Officer can increase the time (if needed) to enforce the bylaws and make building inspections.
8. The minutes from the Township Council Meeting could be posted on the township website and copies sent to the Lake Associations.

There is always room for improvement!!

Thank you for giving me the opportunity to answer your questions and if I am running in your ward, I would appreciate your support!!

Yours Truly
