

Hello

I will do my best to answer your concerns.

1. I think the important issue facing Council is to promote growth within our township and to keep our taxes down. I am a full time resident of the township and a member of the working class so I can't afford high taxes myself.
2. I have always been interested in hearing people concerns and try my best to answer their questions. New businesses and recreation programs are only two of my interests since being on council.
3. The present council has always been willing to work with new businesses wanting to come into our township.
4. Everyone's input is of value to council. A member of council has always tried to attend the lake association meeting and then return to council with the concerns that have been brought out. I have always listened to these concerns with an open mind and try to help find solutions.
5. Whenever possible it is good to work with your neighbouring townships but sometimes two councils have totally different views on some issues.
6. Any concerns brought forward by our lake associations definitely should be considered. Our lakes are a very important part of our environment and should be protected for future generations.
7. At this time I feel that our building inspector and by-law enforcement officer is doing a good job. He does his inspections on a regular basis and when called upon for enforcement of bylaws he is also available. More hours means more tax dollars.
8. I am aware that our website has been a little slow being updated and we are working to improve this. All taxpayers should be aware of what council is doing in representing them.

Thank You

Janice Kerr
